DPD-4676-59

8 July 1959

MEMORANDUM FOR: Acting Chief, DPD-DD/P

25X1A SUBJECT : Addition of Auto Pilot [] Tech Rep to Base "B"

25X1A

25X1A

1. Since May 1958 we have not had a [] Tech Rep at Base B due to [] preference for additional LAC electricians instead. He had found from experience that the LAC electricians could handle the AP just as well as a [] Technician and with additional electricians he would have better balanced crews. Thus two more electricians were added to his complement in July 1958.

25X1A

25X1A9A

25X1A

2. On 6 July 1959 [] LAC Personnel Manager, called to say that their Engineer at the Test Site had recommended that a [] Tech Rep be added to Base B. The performance of the PA with the J-75 is exceedingly sensitive and requires the very finest adjustments possible. They feel strongly that only a factory trained technician has the capability necessary.

25X1A

3. The LAC test crew going to Base B with the J-75 will include the [] Tech Rep presently at the Test Site.

25X1A

4. With your approval I shall arrange with [] to get a [] man ready to go to Base B as soon as possible. It would be especially helpful to have the new man in place when the test team arrives.
